

ΩMEGA TMM

POWERED BY TDM SYSTEMS

LEVERAGE OUR PARTNERSHIP TO WIN THE INDUSTRY 4.0 RACE

Measure

Omega TMM manufactures world class tool presetters that are the most accurate, repeatable, and reliable measuring machines on the market. Omega presetting machines can help improve efficiency to make you a market leader in your industry!

Manage

Tool Data Management with TDM Systems centralizes and optimizes your production resources automatically and accurately. Thanks to a custom highly integrated interface between Omega presetters and TDM, proper preparation and exact measurement can be assured- within the proper tolerances in a single click!

Repeat

The benefits of repeatability are increased productivity, consistent tool planning, and mistake/error reduction. The combination of Omega and TDM is the solution you have been looking for!

Saving you Time and Money

We've built this partnership based on the challenges you see every day on the shop floor. Improving your efficiency guarantees you time and money savings while making you the vendor of choice. Your success starts by surrounding yourself with partners who work together to take the guesswork out of production by combining many years of knowledge and experience to make you the industry leader!

The Perfect Hardware/Software Combo

Omega TMM has evolved from decades of leadership in the tool holder and presetter business, now run exclusively under the Omega brand. TDM Systems is the pioneer of tool data management with over 25 years of success.

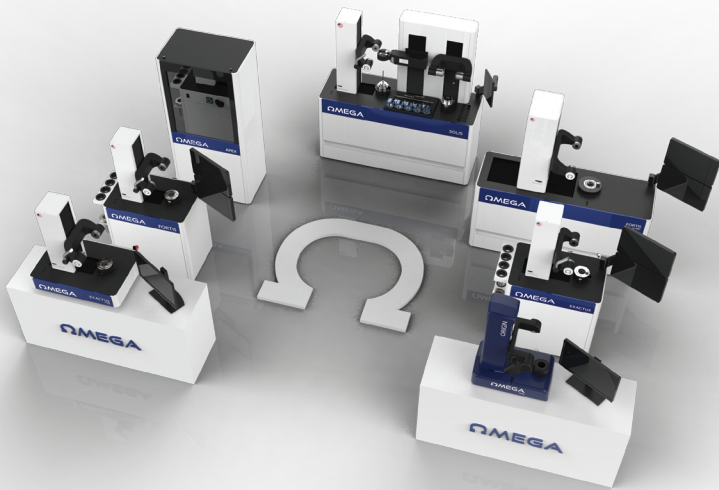

Two Global Leaders Coming Together

Precision begins with Omega TMM powered by TDM and ends with the perfect part the first time every time! From small tool room systems to worldwide integrations, Omega TMM and TDM can support you no matter where you are on the globe. We understand your industry needs and provide you with Tool Lifecycle solutions to solve your daily challenges. We understand that one size does not fit all and we use a consultative approach to determine what the best fit is for your company.

Bringing You to Industry 4.0 and More...

Industry 4.0 is optimizing your workflow by bringing digitalization through each step of your manufacturing process by saving time and money. Both Omega TMM and TDM Systems are fully Industry 4.0 ready and can lead you into the next industrial revolution!

A VALUABLE PARTNERSHIP BUILT FOR YOUR SUCCESS

ΩMEGA TMM

World Class Presetters

Omega Tool Measuring Machines is the final word in presetting and inspection. Our passion is your production. Our presetter and shrink set machines, proudly manufactured and assembled at our Fairport, NY world headquarters, are the most accurate, reliable, and repeatable measuring machines on the market.

The Omega TMM “customer-centric” mentality is where it all begins, from research and development to design, to manufacturing to after-sales service, everything we do is laser-focused on creating an outstanding customer experience. Now, and for the foreseeable future, Omega TMM is the benchmark to which all other machines are compared and we welcome the chance to assist in making your manufacturing facility truly world class.

World Class Tool Management

TDM software solutions help you to optimize processes, both in planning and in real production. The recipe for success and the heart of TDM software is the central database for tools and items. It stands for the integration of all simulation and manufacturing systems and machines and guarantees a transparent flow of data across all departments.

The result is a digitalized shop-floor with demonstrably higher productivity saving you significant amount of time and money. With the “a la carte” modules offered by TDM Systems, select what you need, when you need and get one step ahead of your competition. TDM Systems will always have the right solution for your tool management: scalable, grow with you, and adapted to meet your latest developments.
